DETAILED ACTION

Oath/Declaration

1. In view of the papers filed 11/13/2006, it has been found that this nonprovisional application, as filed, through error and without deceptive intent, improperly set forth the inventorship, and accordingly, this application has been corrected in compliance with 37 CFR 1.48(a). The inventorship of this application has been changed by the addition of Simon P. Griffiths.

The application will be forwarded to the Office of Initial Patent Examination (OIPE) for issuance of a corrected filing receipt, and correction of Office records to reflect the inventorship as corrected.

Claim Rejections - 35 USC § 102

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 9 and 11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Wright et al..

Wright et al. discloses a housing having a separation chamber and a collection chamber (fig. 15, 50a',54').

Wright et al. discloses a floor unit having a suction opening (fig. 8, #26).

Wright et al. discloses a passage between the suction opening and the separation chamber (fig. 5, #34,86,82).

Wright et al. discloses a suction source (fig. 8, E).

Wright et al. discloses a structure having a cylindrical wall for defining a path for the stream of air along an internal perimeter of the separation chamber (fig. 15, #160).

With respect to claim 11, Wright et al. discloses an air inlet of the separation chamber defining an inlet path tangential to the path along the internal perimeter of the chamber (col. 10, line 17).

Claim Rejections - 35 USC § 103

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

5. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wright et al..

Wright et al. discloses a similar vacuum cleaner however fails to disclose a restriction

It would have been obvious to one of ordinary skill in the art to provide a restriction in the air inlet of Wright et al. to allow for an increase in air velocity to allow for the most effective separation.

Allowable Subject Matter

6. Claims 1-8 and 14 allowed.

7. Claim 13 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
